2 January 1973

Mr. Frederick Aandahl
Chief, Foreign Relations Division
Historical Office, Department of State
Washington, D. C. 20520

Dear Fred:

We have completed our classification review of the atomic energy related subjects in Galleys 233-335 TAT which you provided us in your letter of 29 September. Most of this material was not intelligence related and generated no problems as you will see from Part I of the attached list.

Although we must object to declassification and publication of all or portions of four documents (Part II), three of these items involve the David Maclean correspondence previously reviewed in my letter to Mr. Franklin of 21 August, and do not represent new cases. The fourth passage, on Galley 270, involves the use of the phrase as reviewed in my letter to you of 27 November. If this phrase is deleted we do not object to the publication of the remainder of the document.

The results of this classification review will also be transmitted to the Atomic Energy Commission, which first requested our views on the declassification of a number of these documents.

Sincerely yours,

Bernard Drell
CIA Historian
